EXPERIENCE

Full Stack Developer (MERN)

Bigmod Technologies (Jun 2024 – Present) – Rampura, Dhaka (Remote)

- Led full-stack development of a Hospital Management ERP (90% personal contribution), ensuring real-time updates, rapid interactions, and efficient caching.
- Engineered a complex online news portal using Next.js (SSR, SSG, ISR) and Node.js.
- Boosted performance by up to 60% and SEO by 70% across 8 diverse projects through strategic optimizations.

Frontend Developer

Shothik AI (Oct 2024 – Jan 2025) – Uttara, Dhaka (Remote)

- Developed cutting-edge AI-integrated frontend features using React.js and Next.js, including OCR, paraphrasing, and proofreading functionalities to enhance content processing.
- Boosted SEO rankings and reduced page load times for AI-generated content through strategic.
- Built a secure, role-based dashboard with advanced access control to optimize user workflows.

Frontend Developer (Next.js)

RedRose Corporation (Dec 2023 - Sep 2024) – Jatrabari, Dhaka (Hybrid)

- Led 85% of frontend development for an EdTech platform using Next.js, implementing a highly secure online quiz system with robust user, time, and IP tracing capabilities.
- Engineered a custom Content Management System (CMS) for eBook, optimizing for rapid loading and seamless performance across all devices.
- Built a custom Text-to-Audio system for eBooks using vanilla JavaScript and integrating it into React.

PROJECTS

1. CarSure – [Live site](#) | [Frontend code](#) | [Backend code](#)

A comprehensive full-stack e-commerce platform for managing car-related products and orders with advanced user and admin functionalities.

- Advanced product search, filtering, and a complete checkout system with integrated payment processing.
- Integrated API caching for optimized performance and image hosting for efficient asset management.
- Implemented secure, JWT-based authentication and robust role-based dashboards (User, Admin, Super Admin).

Technology Stack: TypeScript, React.js, Express.js, Mongoose, ShandCN, Redux, SurjoPay.

2. Dancing Guru – [Live site](#) | [Frontend code](#) | [Backend code](#)

A comprehensive full-stack platform facilitating the buying and selling of dance courses, featuring distinct roles for students, instructors, and administrators.

- Implemented secure multi-method authentication (Email/Password, Google) and role-based dashboards.
- Students enroll, track classes, and view payment history. Instructors can add courses and monitor enrollments.
- Fully responsive UI with dark/light mode, ensuring real-time server/database interaction.

Technology Stack: React.js, Firebase, Node.js, MongoDB, TailwindCSS.
